Spring 2020 CS123A Bioinformatics Project Progress Report

1. How much progress have you made in your project.

   - **Still learning on how to understand how the PSSM algorithm is used. Considering python for the programming component of the project since it has the bio python package.**

2. Do you believe you are on schedule to submit your project by the due date posted on Canvas?

   - **I think I still am on schedule to submit the project by the due date that is posted on Canvas.**

3. Describe any problems or issues that your group is encountering.

   - **Finding an example that explains the process of the algorithm using visuals.**

4. What assistance, if any, do you believe you need from the instructor?

   - **Some assistance would be like resources that may have an example of the PSSM explained step by step using visuals.**
